

NUS Consulting Group is an independent, client-centric, agile energy management and sustainability consultancy.

We are a professional consultancy with offices located in North America, Europe, Africa, and Australia. Our international presence allows NUS the ability to provide commercial and industrial businesses a coordinated global solution delivered by local market experts. We support energy intensive businesses with independent advice on how to optimally navigate the increasingly complex energy and sustainability markets.

nus | Consulting Group

Energy Invoice Processing & Validation

Our team scans your invoices, captures all supplier data, and validates charges, identifying any errors and anomalies. You can be sure you are only paying validated invoices.

Energy Information System

Access, analyze, and share your energy invoice data using our industry leading cloud-based energy information system (NUSdirect).

Rate Analysis & Optimization

Our analysis team reviews your energy data and identifies the optimal rate, tariff or ancillary charge applicable to optimize and reduce your costs.

Energy Procurement

Our procurement team prepares the necessary tender documents to solicit competitive offers from suppliers. You can be confident you have the best supply contract.

Energy Risk Management

Manage price volatility astutely with a strategic risk management plan (SRMP) based on your specific risk tolerance and procurement objectives.

Carbon Offsets, Green Purchasing & PPAs

Our team of subject matter experts can help you develop a detailed sustainability plan to reduce your carbon emissions and achieve your ESG objectives
